PRICE LIST

THE
Westminster Nursery
WESTMINSTER, MARYLAND

Issued August 1st, 1931

Members: American Association of Nurserymen

General Information

Prices: These quotations are strictly in keeping with the quality of our stock. We are making no attempt to compete with growers who are offering inferior strains and poorly grown plants. Prices are given at "each," "per 10," and "per 100" on most varieties offered. Substantial reductions from the "each" rate prevail on quantity orders; thus 5 or more plants of one size and variety will be supplied at the "per 10" rate; 25 or more of one size and variety at the "per 100" rate; 250 or more of one size and variety at the "per 1000" rate. Quantity rates prevail only where quoted.

All prices are net; no additional charges for packing or transportation.

We guarantee our stock to be delivered in good condition.

Delivery will be made in accordance with the planting season. Under no condition do we promise to make delivery on a stipulated date, but we do promise to deliver at the proper time for transplanting.

Terms: Cash with order or upon delivery of the stock, unless other terms have been agreed upon. A discount of 5% is allowed on orders accompanied by cash in full.

Names of Varieties: In compiling our catalog and in this list we have attempted to list varieties alphabetically by their most used names. Perennials, however, because of the number of names given them, are listed alphabetically according to scientific names.

Evergreens

The following prices are for average plants as taken from the nursery rows. You may expect first class stock, well-filled out and carefully graded. If specimen plants are desired, add 15%. If your order calls for "specimen stock" we will select the very best in the fields. All evergreens are balled and burlapped at prices quoted. Note that prices given on evergreens are "each"—no quantity prices are given. For quantities of ten or more of the same variety and size, a discount of 15% is deductible. For quantities of twenty-five or more of the same variety and size, a discount of 20% is deductible.

Broadleaved Evergreens

Like the evergreen prices quoted, the following are for average plants as taken from the nursery rows. All stock will be strictly first class, well filled out, and carefully graded. If specimen plants are desired, add 15%. If your order calls for specimen plants we will select the very best from the field. All Broadleaved Evergreens quoted are balled and burlapped at these prices. Note

that no quantity prices are given; for quantities of ten or more of the same variety and size, a discount of 15% is deductible. For quantities of twenty-five or more of the same variety and size, a discount of 20% is deductible.

Globe Shaped Privet

Our stock of Globe shaped Privet is compact and properly sheared to perfect balls. We ship this stock balled and burlapped, hence can be dug and transplanted at any time during the year. Handle the ball of earth same as an evergreen when planting and, as instructed, do not remove the burlap at all, do not even cut the tying cord. The Globe shaped Privet balls are very appropriate for planting with evergreens. Its glossy black green foliage makes a wonderful contrast when planted in groups of evergreens. Very popular at seashores where evergreens of many varieties fail to thrive. Thousands of both the standard and Globe shaped Privet can be seen at Atlantic City, N. J., where they retain their foliage all winter long.
